

VERSATILE IMAGINATIONS
Since 2003

www.idea.zr

IDEA is an international company specializing in the manufacturing of a wide range of modern urban & garden furniture products for public areas, special designed wooden and metal constructions, as well as architectural forms and design elements for public infrastructure. We are convinced that public areas should be designed in a way, that will inspire the present and future generations. On that end, we always strive to incorporate clever design, creativity, functionality, and amenity into our works. We are always in search of new challenges, to achieve more decisive results, whilst being even more creative and effective.

IDEA thinks globally, acts locally.

VERSATILE IMAGINATIONS

GLUE-LAMINATION

Glue-laminated timber (glulam) is a structurally engineered wood product commonly used for beams and columns. When glued with industrial adhesives, this type of wood is highly durable and moisture-resistant, capable of generating large pieces and unique shapes. Glulam is stronger than steel at comparable weights. That makes glulam a cost-effective choice for long structural spans and tall columns with minimal need for additional support.

HOT-DIP GALVANIZING

All steel components used by IDEA are hot-dip galvanized in a liquid zinc bath at 449 °C. If the surface is damaged, hot-dipped galvanized products repair themselves through zinc contracting and forming a new coating in the damaged area. Zinc is a more active metal in comparison to steel. This is a unique characteristic for galvanizing, which means when a galvanized coating is damaged and steel is exposed to the atmosphere, zinc can continue to protect steel through galvanic corrosion.

IMPREGNATION OF WOOD

The natural beauty of wood is beautiful, but not eternal. If you want the wooden structure in your project or building to last for centuries, then it needs impregnation - a process in which moisture is removed, the pores open, and under the pressure of 12-atmosphere, the "TANALITH E" antiseptic is pushed so that bacteria cannot possibly get inside the wood. Wood can be rot-resistant with proper care; however, after such an appeal, there is no turning back! This will ensure durability both outside and inside as termites love to chew through unprotected wood.

POWDER COATING

The powder coating process offers several advantages over conventional liquid coating methods, including increased durability, capabilities for more specialized finishes, and less environmental impact. In addition, powder-coated products are more resistant to diminished coating quality as a result of impact, moisture, chemicals, ultraviolet light, and other extreme weather conditions. In turn, this reduces the risk of scratches, chipping, abrasions, corrosion, fading, and other wear issues.

PROJECTS

DREAMLAND GOLF CLUB

Dreamland Baku Golf Villas & Living Residences is one of the most visited places by foreign guests due to its luxury golf course and ideal living complex. The description of elements of Azerbaijani history at the entrance to this place is a great reason for foreigners to visit. This artwork, prepared by IDEA for the entrance to the mentioned place, displays examples of fine art expressing elements of the history of Azerbaijan on the material "Cor-Ten." The national ornaments of our country are depicted at the highest level on the architectural pearl, which is almost 180 meters long.

SHUSHA SIGNS PROJECT

IDEA cares about our land's history, and that is why we took up the task of making the new "Shusha" sign. And now, the restored "ŞUŞA" sign welcomes visitors of this landmark that have come to visit the historic center of Karabakh, which was recently reclaimed by the republic of Azerbaijan.

The letters stand tall with the highest point being 3m tall. This is why we made sure to use the highest quality aluminum in the production of these letters, in order to put less weight on the tower, as their overall weight is 300kgs and prevent weathering from harsh weather conditions.

The importance of the quality of this job can not be put into words, as these letters will welcome everyone that visits Shusha for generations to come.

KRISTAL ABSHERON BAYIL

Kristal Absheron Bayil is a residential complex located in Baku. IDEA designed and manufactured tailor-made Pergolas and Litter bins for the courtyard of this project. Grandezza is 30 meters long Pergola that perfectly suits the design of the building. Both pergolas are made from impregnated pinewood and all the connections are individually designed from hot-dip galvanized and powder-coated metal.

PENT-HOUSE MONTIN

IDEA offers a variety of landscaping products that are perfect for commercial places and courtyards. Our products are made to fit perfectly into the exterior design of your building, and we offer a variety of styles to choose from. We also have a wide range of perfect products for your needs. Plus, our products are made with quality outdoor materials, so you can be sure they will last for years.

IDEA products provide great value for money because they are cheaper than traditional solutions without sacrificing quality, aesthetics, or functionality.

AVICOM COURTYARD

IDEA offers a variety of landscaping products that are perfect for commercial courtyards. Our products are made to fit perfectly into the exterior design of your building, and we offer a variety of colors and styles to choose from. We also have a wide range of sizes to choose from, so you can find the perfect product for your needs. Plus, our products are made with quality materials and construction, so you can be sure they will last for years. Contact us today to learn more about our landscaping products!

RED BRIDGE

The RED BRIDGE is a 90-meter-long metal platform with five balconies, and the entire structure consists of bolted joints. The whole platform is powder coated and made by applying special drawing, welding, and cutting. The IDEA Design and Development team has completed particular modelling to achieve the expected results. The design allows the transfer of forces between bolts and sections. In addition the configuration was realized on site after all the sections were manufactured in the production facility. The Red Bridge's shape is slithering in several parts.

idea®

BAKİ
ZİĞİRÇİ
PARKI

BAKU ZOOLOGICAL PARK

IDEA company has finished the "Baku Zoological Park" project in the renovated zoo of Baku city. Our company has successfully completed the architectural work in accordance with the highest quality standards. In addition, the artwork made from Cor-Ten stands tall at the entrance of the Baku zoological park. This complicated, layered artwork was made from full sheets of Cor-Ten that were cut using high-precision lasers. The wood used in this project is impregnated, D4 glue-laminated and coated with water-based paint, which is certified by the "EN 71-3 Safety for Toys" standard. Furthermore, we used galvanized and powder-coated steel, along with the use of Corten for a more rustic look.

idea

BAKIJOOJI PARKI

NATIONAL GYMNASTIC ARENA

NATIONAL GYMNAS TIC ARENA

IDEA's design emphasises the natural spirit of the space, which provides a stunningly beautiful atmosphere around the arena. High-quality, customizable benches, wooden and metal facades, tree grilles, flagpoles, cabanas, hammocks, planters, and recycle bins are a part of the "NATIONAL GYMNAS TIC ARENA" project. The wood used in this project is impregnated, D4 glue-laminated, and coated with water-based paint, which is certified by the "EN 71-3 Safety for Toys" standard. In addition, all the metal in this project is hot-dip galvanized and powder-coated.

PROJECT SAHIL

Uncover the breathtaking Sahil Project in Baku, Azerbaijan. Embrace the allure of its remarkable pergola, built with glued wood for unrivaled strength and durability. Treated to resist termites and bacteria, it promises enduring beauty. Completed with galvanized and powder-coated metal joints for added protection. Experience the perfect fusion of longevity and outdoor elegance with Sahil Residence!

RR CONSTRUCTION IMPERIAL

IDEA presents one of the latest projects for a residential building located in Baku. With the addition of eye-catching landscaping, the courtyard residential building looks more beautiful and has an exemplary character. After the process of landscaping the courtyard, our company has created an ideal environment to ensure the comfort of the people living here. The products we used in this project are Collezione Asado Pergola, La Defense Pergola, Riva Benches, Viva Double Benches, Urbo Litter Bins, Bike Rack, Burberry Lighting, Eco Pinewood with ashtray litter bins, Eco Grey with ashtray litter bins, Tongal Corten Fireplace, Block Entrance Covering. Create your outdoor living space with stylish shading, fresh air, and easy maintenance. Worldwide export is also available.

ENTRANCE FACADE WITH SIGN BBC FOR BAKU WHITE CITY

IDEA LLC transforms the entrance facade of Baku Business Centre in White City, introducing stainless steel sign letters. This bespoke design harmonizes modern elegance with architectural finesse, seamlessly integrating into the dynamic urban landscape. Meticulously crafted stainless steel letters stand as symbols of corporate identity, enhancing aesthetics while ensuring functional excellence. Welcome to a landmark facade, a testament to innovation within Baku's evolving cityscape.

ADA UNIVERSITY

IDEA Company has successfully produced and installed different architectural urban products at ADA University. We covered the huge garden around the university campus with modern designs and quality urban products. We placed seats all over the garden for maximum comfort. The elegant design of the "La Defense" pergola creates an embellished look, while litter bins help to keep the environment clean, and tree grilles allow you to protect nature.

PROJECT ADA UNIVERSITY

SANATORIUM OF THE STATE SECURITY SYSTEM

The Sanatorium of the State Security System is where high professionalism and international standards meet to create an enticing atmosphere. With their elegant appearance, functionality, and comfort, "La Defense" pergolas will beautify your outdoor space. Furthermore, "Millennium" litter bins, "Toni" and "Sunny" chaise lounges are included in this project. The wood we used is impregnated, D4 glue-laminated and coated with water-based paint, which is certified by the "EN 71-3 Safety for Toys" standard, making the pergola water-repellent and UV resistant. Additionally, all metal is hot-dip galvanized and powder-coated.

DENIZ MALL

Located around the Caspian shores, the DENIZ MALL area is stunningly embellished with IDEA products. It is stunningly embellished with IDEA products that are produced in Azerbaijan, are of the highest quality and are an ideal choice for outdoor areas. We installed benches and litter bins for a better experience, as well as some decorative elements that blend in perfectly with the new shopping centre's modern, sleek appearance. Our contribution to the relatively new DENIZ MALL can be seen all around this modern-looking structure.

BILGAH VILLA

BILGAH VILLA

We installed a high-quality, customized ceiling with decking, multifunctional BBQ kitchen cabinets, and a unique "FRONT PERGOLA" for the Bilgah project. It creates a special place for all your outdoor zones and allows you to have a comfortable and relaxing time on sunny days. The use of impregnated and glue-laminated wood coated with water-based paint, which is certified by "EN 71-3 Safety for Toys", makes the pergola water-repellent and UV resistant.

AMBURAN VILLA

The "AMBURAN VILLA" project has been designed in accordance with the most modern city standards and offers an ideal environment for outdoor entertaining. High-quality "Formal Garden" & "Cabana" pergolas, modern "Amburan" handrails, a unique swing-bed, a safety service gate, and a special "Spa Pool Structure" are a part of the project. We used high-quality materials in the manufacturing process, which allows long-term usage and increases durability against harsh conditions.

BAKU OLYMPIC STADIUM

Our company has done some architectural work at the BAKU OLYMPIC STADIUM, which is considered to be the most magnificent sports complex in our country. These two architectural solutions, which are called the "Voyage" and "Cobra" pergolas, beautify the surrounding landscape of the BAKU OLYMPIC STADIUM. In addition, this signboard is placed at the entrance to the Baku Olympic Stadium and makes the view even more beautiful. This sign board's modern, kind of trapezium-style design attracts attention from many sides of the surrounding city area.

SHAMKIR HAP

The SHAMKIR HAP project has been designed in accordance with the most modern standards and offers an ideal environment for outdoor entertaining. High-quality "Primo" benches, modern "Millenium" litter bins, and a special "Signboard" are all part of the project. The "Primo" bench can be identified by its excellent quality and outstanding design. In addition, all of our litter bins include a smart drainage system that is designed to withstand both rain and snow.

HEYDAR ALIYEV PARK

FOUR SEASONS HOTEL

The FOUR SEASONS HOTEL Baku is known for its luxury accommodations and amenities on a waterfront promenade with spectacular views of the Caspian Sea or Old City. Our company has completed for this project high-quality decorative elements such as ornamental balcony balustrades, metal entrance gates, architectural steel structures, port cochere handrails for the entrance area, decorative steel elements for the facade, lighting rods, and flagpoles. The whole structure has been designed to provide both safety and comfort.

PIK PALAS HOTEL SHAHDAG

PIK PALAS HOTEL located in the heart of the skiing tourism of Azerbaijan. External architectural metalworks such as balcony balustrades, flagpoles, porte-cocheres, domed spires, and wooden louvres for windows were created by IDEA for PIK PALAS. Exterior and landscape furniture provide stabilization among those sections. The hotel is situated in Gusar, the northern area of Azerbaijan, which is characterized by severe weather in winter. The metal pieces are manufactured to show high outdoor resistance. The IDEA 300 bench model is included in IDEA's urban bench collection. The material is pinewood, impregnated and painted with water-based paints by Arch Timber A Ltd.

PİK PALAS

DINAMO HOTEL

The most beautiful and luxurious section of the DINAMO HOTEL, which includes the main restaurant staircase, main guest stairs, and skylight, was designed by Alberto Pinto Studio and has been realized by IDEA. Four different radiuses of the balustrades are manufactured from stainless steel, and the entire structure consists of bolted joints. Certain sumptuous metalwork adds spectacular beauty while maintaining the building's spaciousness.

LUXURY VILLA ALBALI

Albali is a Private luxury Villa designed and executed by IDEA. The project contains several exclusive Wooden Pergolas, a 16 meters Glulamned Bridge, and several Wooden Arches and Structures.

This project also includes many more minor elements like Handrails, Balustrades, Benches, and Planters, that decorate the fantastic landscape of the Villas.

All the listed structures were manufactured in the production facility of IDEA and mounted on-site by the company's installation team.

Moreover, the shop drawings were prepared by IDEA's Design and Development Team to get started with the production. Some other relevant works have been added to the scope of supply and installation.

GULUSTAN ENTRANCE

Nowadays residents of urban areas are attracted to more architecturally and esthetically pleasant spaces. Recently, IDEA has produced and installed a ceiling with a special approach. The resulting unique design earned the appreciation of the locals. While being flexible in terms of their functionality, each of the spaces is distinguished by its uniqueness and carefully designed features. We planned to actualize all of our customer's visions, through our architectural solutions. We have shown our prowess in our field. Indeed, the Metal ceiling is designed to accommodate both night and daytime use. Furthermore, the VIP entrance is lit from below with hidden LED lights. Those low-voltage lights are ideal for environmentally efficient use, and they give notes of subtlety to the surrounding atmosphere.

MASERATI

Around us, there are a lot of everyday objects that we may get inspired by. Some architects & designers love to make it by putting small things into a different perspective. The unique car demands a unique place to stand. Getting fascinated by the shape of an ordinary door handle, IDEA's design & production team created this fantastic exhibition stand for Maserati cars @Azerbaijan. The unique car demands a special place to stand. Getting fascinated by the shape of an ordinary door handle, IDEA's design & production team created this fantastic exhibition stand for Maserati cars @Azerbaijan.

GREEN HOUSE

This modern GREEN HOUSE is made of tempered glass with black steel frames. Roof windows on both sides of the greenhouse are designed to function and are simple to open and close manually. The bottom side and basement of the structure are made of concrete. In the gardens, this modern and modest greenhouse provides warm air inside and allows you to grow plants in winter. The combination of hot-dipped galvanized & creates powder-coated metal and special glass forms the main structure of the Green House.

BESPOKE

POS TERMINAL STAND FOR PAYMENT STATION

The POS terminal stand is great for making your credit or debit card transactions smoother and faster. It is made of durable metal to withstand heavy use, and it bolts securely to the counter to deter theft. The base, bolts securely to the countertop for a sturdy installation. As you can see, the handle for POS terminals is able to move with a convenient rotating function.

POS STAND PAX A35

PAX Technology is a leading provider of electronic payment solutions. IDEA offers complete business solutions for the payment terminal used in retail transactions. This device is essential for processing payments and completing transactions in a timely and efficient manner. As a crucial component of any business, it is important to ensure that your POS system is up-to-date and functioning properly to provide a seamless customer experience."

POS TERMINAL X990 VERIFONE

The POS Terminal X990 Verifone is a reliable and efficient point-of-sale solution that offers secure and fast transactions. With its advanced features and user-friendly interface, it is the perfect choice for businesses of all sizes.

POS STAND VX680 VERIFONE

We want to introduce you to our modern device - Pos Terminal Handle. The presence of a POS system in the store is paramount because it has become popular among people who pay by contactless card, without touching the card. Simply put, a POS is where your customer pays for a product or service in your store. As you can see, the handle for Pos Terminals is made of metal, with a convenient rotating function. It has adhered to modern standards as well. Also, arrangement of the product are made according to the customer's order.

POS STAND X990 VERIFONE (TAXI)

The POS Stand X990 Verifone (Taxi) Handler is a must-have accessory for businesses. It offers a secure and stable base for the X990 Verifone device, making it easy to handle and process payments. Its durable design ensures it can withstand the rigors of daily use, making it the perfect choice for taxi drivers.

POS MARKET

Get acquainted with the next contemporary product of IDEA company - Pos market handler. The most basic purpose a point-of-sale terminal serves is simply allowing a customer to pay for their items. Nowadays, this means reading their credit or debit card, confirming the purchase is authorized and then triggering the printing of a receipt. This "Pos market handler" is aimed at providing maximum flexibility for payment processing. As you can see, the handle for "Pos Market" is made of metal, adapted to modern standards with a convenient rotating function. Dimensions are made according to the customer's order.

TIGER

A "TIGER" is a creative structure that can play both functional and decorative roles. Its unique style makes visual improvements in different designs. You can embellish the product with different items, or store your books or accessories. Our company's manufacturing process, which allows for long-term usage and increases durability against harsh conditions.

PARAMETRIC WALL DROP

"PARAMETRIC WALL DROP" is a visual embellishment for any interior, giving the effect of a ripple on water, as well as playing a functional role by dividing and creating zones in places. We used impregnated wood coated with water-based paint, which is certified by "EN 71-3 Safety for Toys" for this unusual wall.

SPIRAL STAIRS

The Spiral combines precise design with a good technical solution. Its core column is formed in such a way that it is pleasant to use, even in tight spaces. Spiral stairs are more than simply a staircase; they're also a lovely addition to your home's decor.

BALUSTRADE BALCONY VILLA BADAM

IDEA created a special balcony system for the "VILLA BADAM" project. The whole structure has been designed to provide both safety and comfort. Moreover, the system creates a visual embellishment in exterior designs. Our company uses high-quality materials in the manufacturing process, which allows for long-term usage and increases durability against harsh conditions.

TRANSPARENT LIGHT BOX

The sleek and shiny design of the "TRANSPARENT LIGHTBOX" helps you find the right way and creates an attractive illumination effect in the evening. Backlit signs are ideal for messages that need to be seen with high contrast. Lighting is radiant and attractive, giving your brand a competitive edge. In particular, lights naturally attract the eye, making them popular with all those that need their signs to be seen.
